Installation:

Anchored to the concrete floor with expansion or chemical bolts all around the perimeter using the base tab. Finished with compacted material coating either continuous wet-pour rubber surfacing or rubber tiles.

Maintenance:

Check: all fixing points, screws and bolts must be periodically checked and tightened again if necessary. The checking date must be annotated in order to establish a control.

Inspections:

-Routine inspection: A visual and functional inspection must be carried out every 3 months in order to check the module has suffered no mishand-les or vandalisms.

-Yearly inspection: A full inspection of the whole installation has to be done to verify it keeps all security norm standards and has suffered no alterations.
